

# CHINA

*How does China fit into the new world order?*

## Population

With around 1.4 billion people China is the most populated country in the world. The population density is 153 people per square kilometer. More people live in the east of the country.

## One child only policy

A population planning initiative in China implemented between 1980 and 2015 to curb the country's population growth by restricting many families to a single child.

## Economic Activity

China uses the Chinese Yen as the national currency. Over the past 40 years, the Chinese economy grew rapidly, and is now the 2nd largest economy in the world (behind the USA).

## Resources/Trade

China's vast size means that it has rich natural resources. It has also become a work leading producer of a range of products including smart phones, computers, machine parts, electrical transformers, clothes and furniture.

China is a country in eastern Asia

China is a vast country that borders with 14 other countries

China has a long coastline on the East and South China Seas, which are part of the Pacific Ocean

China is the 2nd largest country in the world by total area

Around 1.4 billion people live in China.
